Getting to Know: Levenmouth Health & Social Care Locality Planning

ABOUT US Fife Health and Social Care Partnership Vision

To enable the people of Fife to live independent and healthier lives.

ABOUT US Fife Health and Social Care Localities

April 2016 triggered one of the biggest transformations of health and social care services in Scotland – to have health and social care services delivered jointly, locally and as effectively as possible.

In Fife, this meant a vast range of services from NHS Fife and Fife Council's Social Work Services transferred over to Fife's Health and Social Care Partnership to meet this aim and to support people to live healthy, independent lives.

Services within Integration include:

- all adult and older people social work services
- community health services e.g. district nursing, physiotherapy and mental health services
- children's community health services e.g. health visiting
- housing services which provide support services to vulnerable adults and disability adaptations; and
- the planning of some services provided in hospital e.g. medical care of the elderly.

Localities provide one route, under integration, for communities and professionals (including GPs, acute clinicians, social workers, nurses, Allied Health Professionals, pharmacists and others) to take an active role in, and provide leadership for, local planning of health and social care service provision.

Localities aims to achieve the aspirations we share for health and social care integration, with partners across the health and social care landscape, and their stakeholders, focussing together on our joint responsibility to improve outcomes for people.

Localities must

- a) Support the principles that underpin collaborative working to ensure a strong vision for service delivery is achieved. Robust communication and engagement methods will be required to assure the effectiveness of locality arrangements.
- b) Support GPs to play a central role in providing and co-ordination care to local communities, and, by working more closely with a range of others – including the wider primary care team, secondary care and social care colleagues, and third sector providers – to help improve outcomes for local people.
- c) Support a proactive approach to capacity building in communities, by forging the connections necessary for participation, and help to foster better integrated working between primary and secondary care.

ABOUT US Fife Health and Social Care Localities

Partners participating in localities:

- ❖ General Practice
- ❖ Primary Care
- ❖ Secondary Care
- ❖ Housing
- ❖ Social Work and Social Care
- ❖ Third, voluntary and independent sector

The Journey

ABOUT US Making it Happen in Levenmouth

Fife Health & Social Care Strategic Plan 2019 – 2022 – Strategic Priorities

PRIORITY 1	Working with local people and communities to address inequalities and improve health and wellbeing outcomes across Fife
PRIORITY 2	Promoting mental health and wellbeing
PRIORITY 3	Working with communities, partners and our workforce to effectively transform, integrate and improve our services
PRIORITY 4	Living well with long term conditions
PRIORITY 5	Managing resources effectively while delivering quality outcomes

National Health and Wellbeing Outcomes

The National Health and Wellbeing Outcomes are high-level statements of what health and social care partners are attempting to achieve through integration and ultimately through the pursuit of quality improvement across health and social care.

By working with individuals and local communities, Integration Authorities will support people to achieve the following outcomes:

OUTCOME 1	People are able to look after and improve their own health and wellbeing and live in good health for longer
OUTCOME 2	People, including those with disabilities or long-term conditions, or who are frail, are able to live, as far as reasonably practicable, independently and at home or in a homely setting in their community
OUTCOME 3	People who use health and social care services have positive experiences of those services, and have their dignity respected
OUTCOME 4	Health and social care services are centred on helping to maintain or improve the quality of life of people who use those services
OUTCOME 5	Health and social care services contribute to reducing health inequalities
OUTCOME 6	People who provide unpaid care are supported to look after their own health and wellbeing, including to reduce any negative impact of their caring role on their own health and well-being
OUTCOME 7	People using health and social care services are safe from harm
OUTCOME 8	People who work in health and social care services feel engaged with the work they do and are supported to continuously improve the information, support, care and treatment they provide
OUTCOME 9	Resources are used effectively and efficiently in the provision of health and social care services
